

Burning Bush
(*Euonymus alatus*)

The Knox County Cooperative Weed Management Area (CWMA) is a local, non-profit organization, whose mission is to minimize the impact of invasive plant species in Knox County by educating the public; monitoring and removing invasive plants; and promoting and protecting native plants.

These species were selected because of their abundance and disruption to the environment, human health, and/or economy.

You can contact Will Drews (Natural Resource Specialist at the Knox County SWCD) for more information about how to control these species.

Phone: (812) 882-8210 ext. 3408

Email: willem.drews@in.nacdn.net
