

# SEPTEMBER 10, 2022 INVASIVE PLANT CONTROL TRAINING FOR LANDOWNERS

Learn how to control out-of-control invasive vegetation on your forest property.

Practical, hands-on training by foresters and natural resource professionals.

Topics:

- Assessing your invasive plant problem – species, size, amount
- Three pillars of invasive management – prevention, early detection, strategic management of existing infestations.
- What are your control options and deciding which methods are best for your situation.
- Herbicides? Which to use, how to read the label, calculating rates, how to mix, application methods and techniques, timing, safety, laws and regulations.
- Funding and technical assistance
- Hiring a contractor
- Set your goals and objectives. Put it all together in a plan.

Covid Instructions: For the health and safety of other attendees, please do not attend if you are feeling ill or are required to self isolate or quarantine. Attendees that must cancel due to Covid-19 will receive a full refund.
